<p>* In general, AspenTech aspenONE® software license agreements with customers permit use of the licensed software on Supported Computers at customer Sites. "Supported Computers" include computers with a manufacture, model and operating system for which AspenTech offers a supported version of the software, and that are controlled by the customer. "Sites" are customer facilities or locations specified in the license agreement.</p> <p>AspenTech permits customer use of licensed aspenONE software in the cloud where: (i) the Platform Support specifications published by AspenTech for the relevant version of the software product include cloud support; (ii) only the customer has access to the licensed software hosted by the cloud service provider; and (iii) the user is accessing the software only from a Site specified in the applicable license agreement.</p> <p>Cloud deployment does not change any license restrictions, including the restrictions on which regions can access the software.</p>	<p>Supply Chain Management (SCM) suite consists of the following products: Aspen Collaborative Demand Manager (CDM), Aspen Plant Scheduler, Aspen Supply Planner, Aspen Distribution Scheduler, Aspen Inventory Planner, Aspen Scheduling Insight, Aspen Supply Chain Analytics and Aspen Supply Chain Connect (ASCC).</p>							
When running software on a virtual machine, the machine should meet the same requirements.								
AspenTech does not support the in-place upgrade of the Operating System (for example: upgrade Windows 7 to Windows 10) with AspenTech software already installed. Our recommendation is to uninstall Aspen Software before upgrading the OS and reinstall it after the upgrade.								
Your Aspen SLM Server must be installed and running prior to installing any V11 product.								
If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.								
For SLM server using the Type 1 Desktop configuration, the minimum memory is 4GB with 20GB hard drive.								
Microsoft Active Directory/Domain Services (Required for aspenONE Web Server)								
<sup>1</sup> This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for								
<sup>2</sup> EDR does not use any database servers. Deploys its own LocalDB database files.								

Suite	Manufacturing & Supply Chain Suite							
V11 Platform Specifications that are supported	Supply Chain Management (SCM)							
	Demand Management 64-bit	Collaborative Forecasting 64-bit	Plant Scheduler 64-bit	Aspen Schedule Explorer (ASE) 64-bit	Supply Planner 64-bit	Aspen Scheduling Insight Planning Board 64-bit	Aspen Supply Chain Analytics 64-bit	Aspen Supply Chain Connect 32-bit
<p><b>3</b> Aspen Batch Process Developer does not support the 64-bit version of Visio. Visio is used in ABPD to generate the block diagram and process flow diagram reports; it is an optional feature. The 64-bit versions of Word and Excel are fully supported by ABPD.</p>								
<p><b>4</b> When Aspen Utility model is driven by Aspen Online using Local System Account, then SQL Express 2014 is required.</p>								
<p><b>5</b> When Exchanger Design and Rating is driven by Aspen Online using Local System Account, then SQL Express 2014 is required</p>								
<p><b>6</b> Aspen Modeler family supports FORTRAN compiler version 2017 or 2019</p>								
<p><b>7</b> Oracle Java is needed if the 3rd party scheduling application Primavera is used with Economic Evaluation (EE). Primavera is owned by Oracle and its API uses Java.</p>								
<p><b>8</b> Must be in compatibility mode for Aspen Process Sequencer</p>								
<p><b>9</b> See "Basic Deployment Recommendations" in Appendix C of the Aspen Manufacturing Suite Advanced Process Control Installation Guide.</p>								
<p><b>10</b> For new installations of APC Web Server, install IIS and JRE before installing APC Web Server</p>								
<p><b>11</b> CIM-IO Interfaces can be installed on 32-bit desktops</p>								
<p><b>12</b> This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for acceptable</p>								
<p><b>13</b> Refer to KB 47648 For more information on configuring SCM products using Azure:</p>								
<p><b>14</b> Oracle Database 12.1.0.2 is supported for Collaborative Forecasting, not 12.2.x.</p>								
<p><b>15</b> ASCC web applications and the Informatica client will work only with MS Office 32-bit. Informatica Server uses 64-bit Office only.</p>								
<p><b>16</b> Non-English OS's are not supported</p>								

Suite	Manufacturing & Supply Chain Suite							
V11 Platform Specifications that are supported	Supply Chain Management (SCM)							
	Demand Management 64-bit	Collaborative Forecasting 64-bit	Plant Scheduler 64-bit	Aspen Schedule Explorer (ASE) 64-bit	Supply Planner 64-bit	Aspen Scheduling Insight Planning Board 64-bit	Aspen Supply Chain Analytics 64-bit	Aspen Supply Chain Connect 32-bit
17 If using IBM Maximo Adapter								
18 1 If using aspenONE Exchange on Windows Server 2012 R2, you must select the Desktop Experience option during Windows installation to enable Flash training videos.								
19 SLM supported in cloud (Azure VM/Amazon VM) for ENG products that are supported in the cloud								
20 If FIPS is enabled, aspenONE Exchange users must have the latest Windows Update patches installed on their machine.								
21 Office 365 - 32-bit support only								
22 Requires the latest patches of the corresponding AspenTech software								
27 WVD Certification Notes – 1. Publishing WVD apps to users local machine start menu not supported 2. Interoperability with 3rd party products only supported with Office 365 3. Aspen Properties Enterprise Database (APED) via SQL Server not supported 4. The following products have not been certified for WVD: ABE, ABPD, AOL, AVCA								
28 APEM does not support CDB-PDB database in Oracle 12.2. Weigh & Dispense Client 32-bit does not support Oracle								
29 APP-V is only supported with Process Explorer								
30 When you have more than 8 simultaneous users, the recommendation is 2CPU's and 4GB RAM per user. Performance will vary based on product and usage profiles. This can be considered a starting point for large multi-user machines.
